

Audio & Video Equipment

All of our event venues are equipped with premium sound, video, and connectivity options. We encourage you to review the specifications here and consult with us, as well as your band, before renting external sound equipment. Our equipment is tailored to meet the majority of requirements.

Høyloftet

- 135-inch screen + HD projector
- Webcam for Video Conferencing
- 1 wireless boom microphone and 2 wireless handheld [microphones](#) that can be used at the same time.
- 2 x [JBL stereo speakers](#) + mixing console for robust sound suitable for conferences, parties, and small concerts. (type troubadour or similar 1-2 people - acoustic)
- Seamless connectivity via USB-C for the majority of Windows (Windows 10 and 11) and MAC (models from 2021 onward). One cable supports both video and audio, as well as camera functionality.
- Music playback can be connected to speakers through a mixing console via Bluetooth or cable.

Teina

- 135-inch screen + HD projector
- Two wireless handheld microphones that can be used simultaneously + stand.
- 2 x [Electrovoice Evolve](#) high-performance PA speakers with excellent sound quality. Integrated mixing console, user-friendly operation. Suitable for conferences, parties, and concerts.
- Effortless image connectivity via HDMI for all laptops. We also offer adapters for MAC.
- Music playback can be linked via Bluetooth to PA speakers, or:
- Our [Sonos](#) system delivers a warm and uplifting musical ambiance throughout the venue. Music playback through Sonos is managed via our POS PC.

Nikel

Lounge - a space for relaxation, viewing films and images, among other activities.
